PROJECTS

Landing Page

<https://prateek1430.github.io/Course-html-css/>

This project is made using Html and CSS. Working on this project was fun which further helped me learn new things.

Landing Page

<https://prateek1430.github.io/Landing-page-unstoppableteen/>

Working on this project was fun which further helped me learn new things. I have made this website with Html, CSS and the code is completely written from scratch by myself.

OTP Generator

<https://prateek1430.github.io/otpGenerator/>

This app Dynamically generate OTP according to a select option of 4 and 6 digits value. I have made this website with Html, CSS, JavaScript and Bootstrap. the code is completely written from scratch by myself.

Calculator

[https://prateek1430.github.io/calculator/calculator\(1\).html](https://prateek1430.github.io/calculator/calculator(1).html)

I have added this project as a mini project. This project is made using Html, CSS, JavaScript which does all the basic necessary mathematical functions. It takes input value with mouse click as well as keypad number input.
